Step 1 — Cut Out the Body

- Print off the template, trace it, and cut out your flower.

⚠ If you plan on freehand cutting your body, be sure to read all the directions first. Pay special attention to how we create the battery holder.
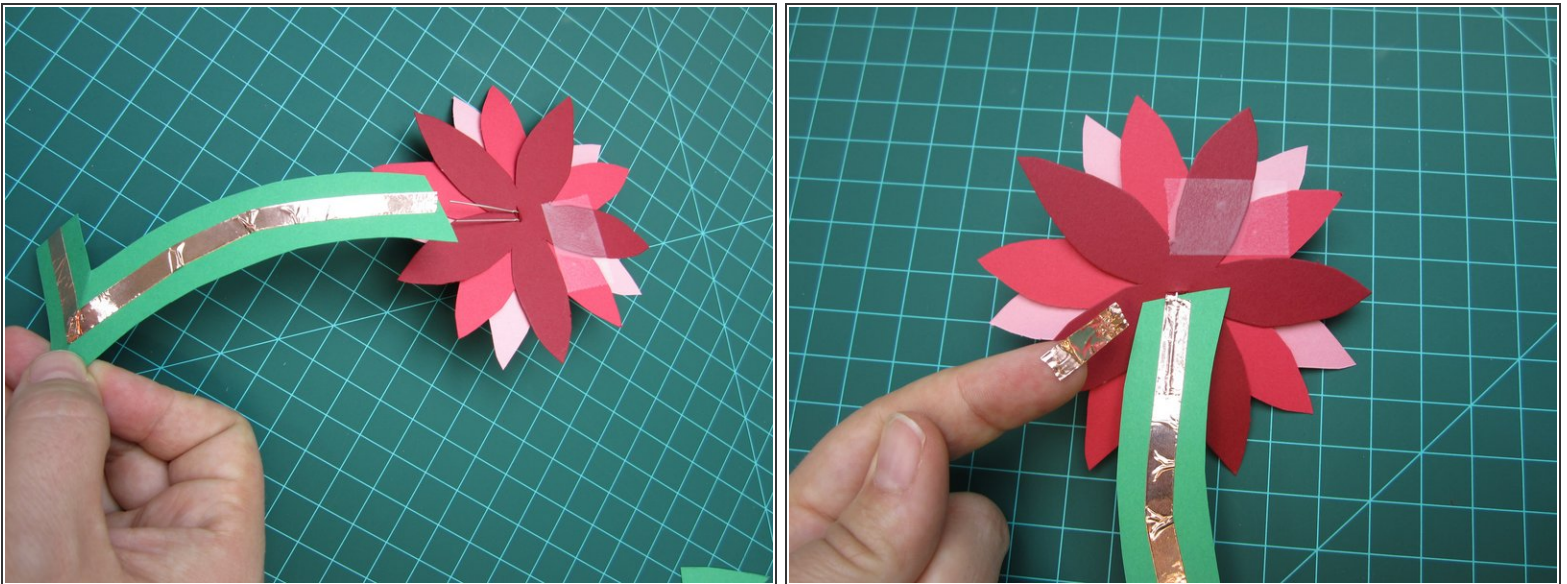

Step 2 — Tape the Stem

- Use two lines of conductive tape, one on each side.

- Wrap one line of tape around the short leg of the stem.
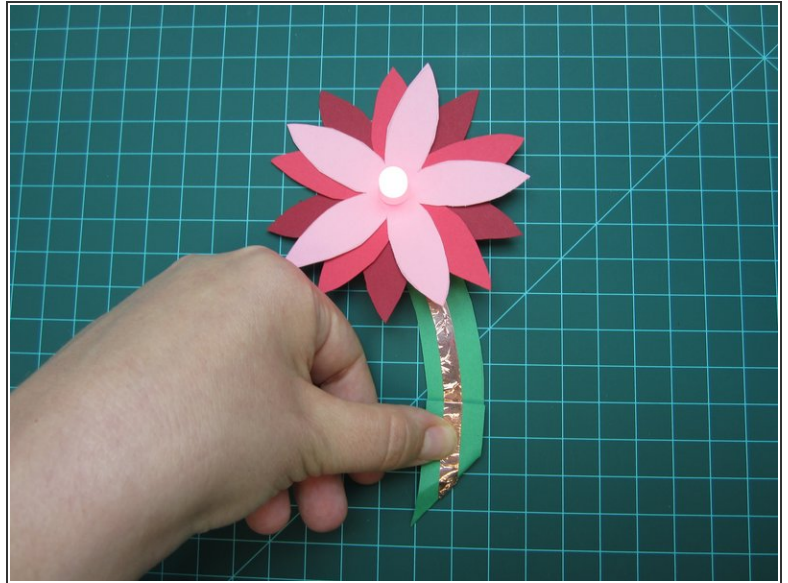

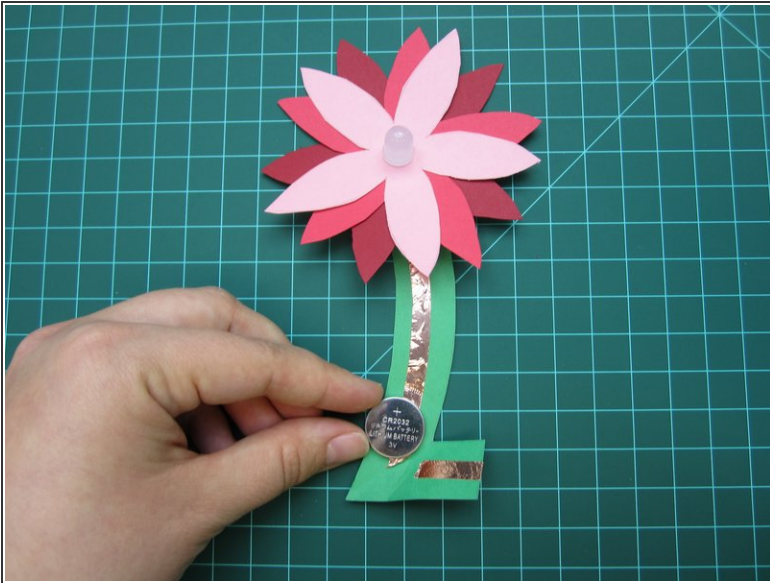

Step 3 — Poke the LEDs Through

- Line up your layers of flower peddles and cut a slit in the middle of each one.

- Poke both LED legs through the slits.

- You want to leave enough room so that you can spread both legs apart a bit.
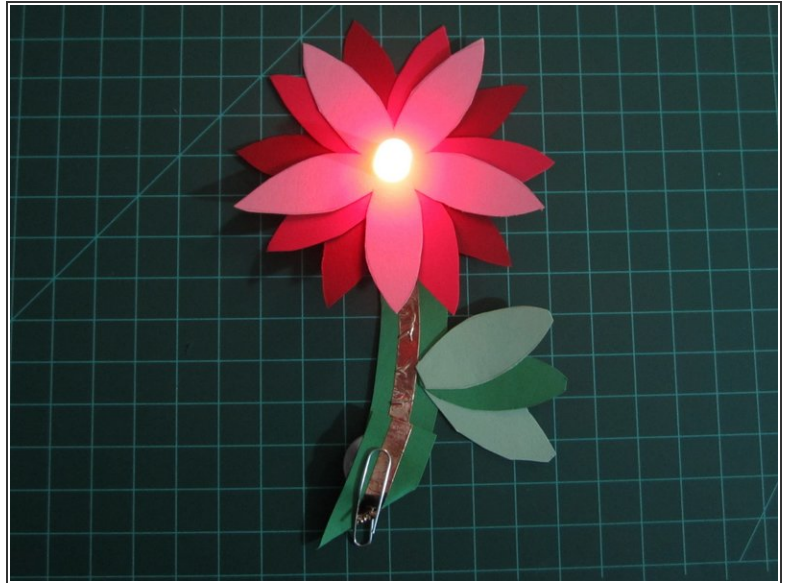

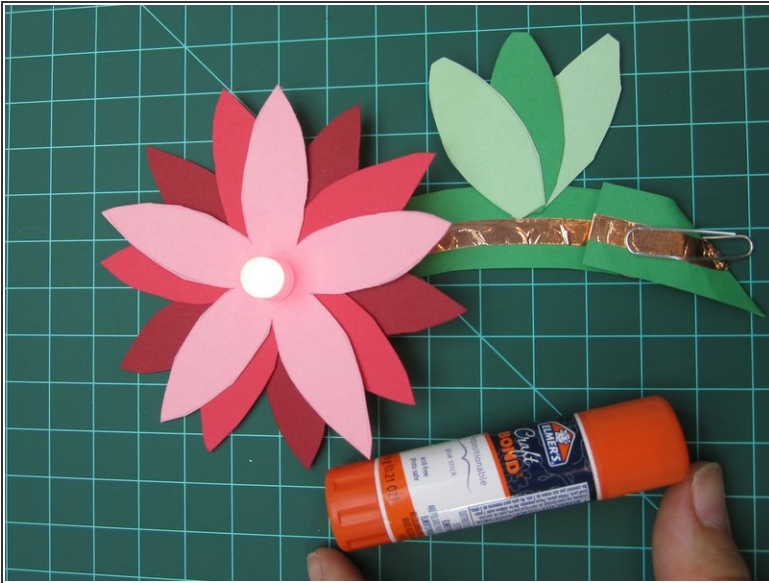

Step 4 — Connect them to the Tape

- Place one leg on each side of your stem, over the top of the tape. One leg per piece of tape.

- Cut off a small piece of tape and use it to tape down each of the LED legs to the conductive tape on the stem.

Step 5 — Add a Battery

- Place your battery at the bottom of the stem.

- Folder over the short end of the stem.

- Your LED should light up. If it does not, flip the battery over and see if that fixes things.

Step 6 — Secure Everything

- Use a paperclip or binder clip to hold the battery flap in place.

- Add in your leaves by using glue, tape, or other means.

- (i) Pin it to yourself to look cool at fancy dinner parties or events.
