## Step 1 — Download and Print

- You can download the file and print it on your own 3D Printer.

- Find it in our GitHub repository: https://github.com/BrownDogGadgets/3D-Pr...

- This file will work with our 2AAA Battery Holder.

Step 2 — Tips & Tricks

- The battery pack sits inside the holder loosely. If you want a more secure fit you can add some tape to hold the battery pack into place.

- ⚠ Every 3D printer is a little different! If your part doesn't fit on a baseplate here are a few things to try.

  - Part too tight? Try sanding it or cutting away some material with a knife.

  - Part too loose? Add two LEGO bricks on opposite sides of the part.

  - You can also try printing it at slightly more or less than 100% scale.
