

# A Ton To Be Thankful For Card

This Thanksgiving create a light-up card to show how thankful you are. Just add an LED, a CR2032 battery, and some Maker Tape.

Written By: Andy Wallus

## INTRODUCTION

This Thanksgiving create a light-up card to show how thankful you are. Just add an LED, a CR2032 battery, and some Maker Tape.

There's a full-color version as well as a black & white version that makes a great coloring activity.

You can make this project (and many more!) with our **Paper Circuits Kit**.

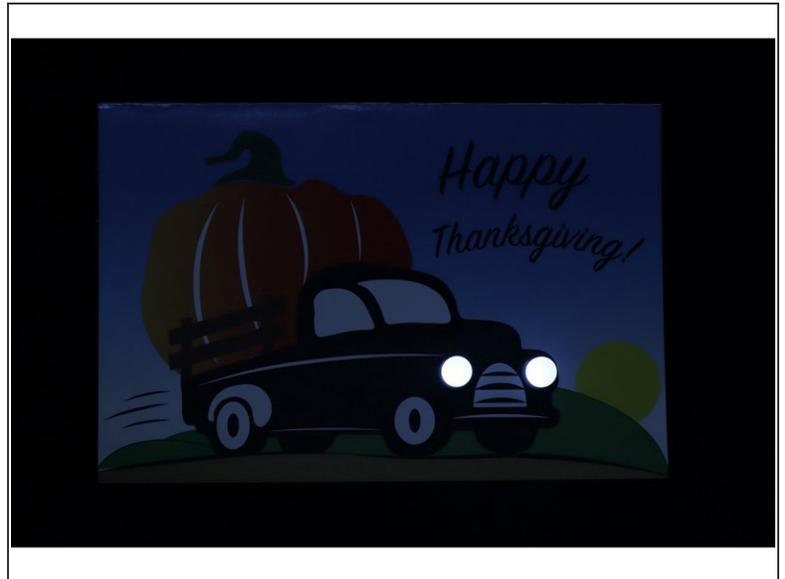

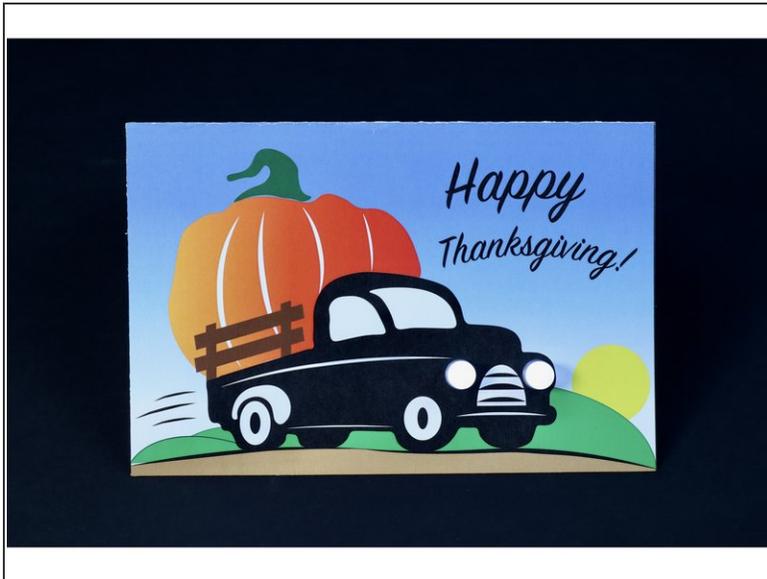

### TOOLS:

- [Scissors](#) (1)
- [Markers, Crayons, or Colored Pencils](#) (1)
- [Push Pin](#) (1)

### PARTS:

- [Paper Circuits Kit](#) (1)
- [Printable Template](#) (1)

## Step 1 — Make Your Card

- **Print and cut** out the card version of your choice. **Color yours** any way you'd like **if you chose the uncolored version.**
- **Follow the instructions and circuit diagram** on the back side of the image to assemble the circuit and complete the card.
- **NOTE:** Connecting the final Maker Tape section to the top of the battery will turn the headlights of the pumpkin truck ON, while peeling it back will turn those lights OFF.

Happy Thanksgiving!
