Turkminator

Half turkey, half machine. Sent back in time to save the future.

Written By: Joshua

INTRODUCTION

Half turkey, half machine. Sent back in time to save the future.

This silly project uses a two layer approach to create a cyborg turkey. You can either use a single piece of paper and show off your conductive tape, or print off the second template to hide your circuit.

TOOLS:

- Scissors (1)
- Glue (1)

PARTS:

- Maker Tape (1)
- Paper Circuits Kit (1)
