

# Father's Day BBQ Card

Create a fun light-up card for Father's Day. Just add an LED, a CR2032 battery, and some Maker Tape.

Written By: Pete Prodoehl

## INTRODUCTION

Create a fun light-up card for Father's Day. Just add an LED, a CR2032 battery, and some Maker Tape.

There's a full-color version as well as a black & white version that makes a great coloring activity.

You can make this project (and many more!) with our **Paper Circuits Kit**.

### TOOLS:

- [Scissors](#) (1)
- [Safety Pin](#) (1)

### PARTS:

- [Paper Circuits Kit](#) (1)

## Step 1 — Make Your Card

- In general build this project in this order:
  - Print out the full-color card, or print out the black and white card, and color/decorate as desired.
  - Poke holes through front for LED legs, then push legs through front.
  - On inside of card, bend legs down flat against paper.
  - Add Maker Tape and battery to complete your circuit.
- ① Note: If you are using thicker paper (such as cardstock) we recommend using a large safety pin to poke the holes in the paper to put the LED legs through.

Enjoy your card!
