

# Solar Science Station Build Guide

Build your own solar data gathering tool for the classroom or use as a science faire project.

Written By: Joshua

# INTRODUCTION

Build your own solar data gathering tool for the classroom or use as a science faire project. Record local solar data using the build in solar panel and volt meter.

## TOOLS:

- [Screw Driver](#) (1)
- [Wire Stripper](#) (1)

## PARTS:

- [Solar Science Station Kit](#) (1)

Try taking basic data readings throughout the day. Try recording voltage readings at 3-4 angles and at each cardinal directions (North, South, East, and West). Do this over several days. Graph your data.
