Rover - Flag Holder

Add flags to your Rovers so you can tell which is which in the classroom.

Written By: Pete Prodoehl

INTRODUCTION

Add flags to your Rovers so you can tell which is which in the classroom. (Or just add a flag because flags are cool!)

🔧 **TOOLS:**

- Scissors (1)

⚙️ **PARTS:**

- Bit Board Rover Kit (1)
- Markers, Crayons, or Colored Pencils (1)
- Painter's Tape (1)

Step 1 — Gather Your Materials

- The basic idea is that in a classroom full of Rovers they all look the same so we want an easy way to identify which is which. (Especially if they are being driven around via Remote Control.)

- We'll use the Pen Holder as a Flag Holder so we can tell different Rovers apart.

- For materials you can use felt, paper, dowels, drinking straws, popsicle sticks, cardboard… There are a ton of different art/miscellaneous supplies that can work.

Step 2 — Make Flags

- We used sticky notes for our flags. You can write numbers (or letters, names, symbols, emojis, etc.) on them, or if you have a variety of colors, you can even leave them blank.

- For our sticky note flags we just stuck them onto a drinking straw or a popsicle stick and added a number.

- You can get much more elaborate and ornate if you want. We also made a set of "Deluxe Flags" that are felt, with numbers cut from felt and glued in place, and added strings to hold them onto the dowels.

- Making flags is where you can allow creativity to shine, and every Rover can have its own unique flag.
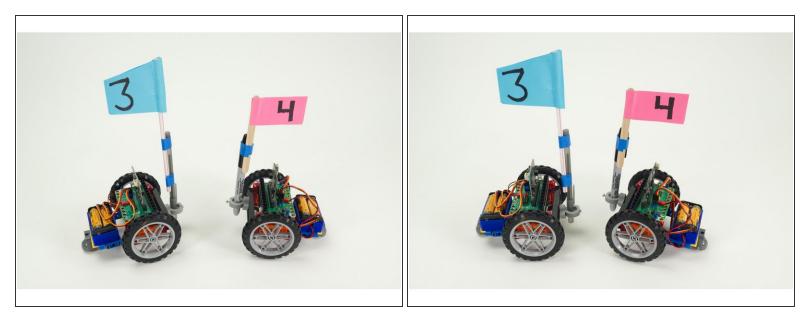

Step 3 — Prepare the Pen Holder

- The Pen Holder comes with a 3mm screw that works great for holding a marker or a pen, but won't work well for a drinking straw, popsicle stick, or thin dowel.

- We just used a marker (or pen) as shown held in place so that we've got a nice solid base to attach our flag to.

- Can you just add your flag to the marker or pen? You can! There's more than one way to add a flag to your Rover.

- Since we wanted a bit more height to our flags we're going to stick them onto the marker/pen for some additional height.

## Step 4 — Add the Flag to the Pen Holder

- We used blue painter's tape to attach our flags to the marker/pen that is securely held in the Pen Holder.

- You can use any tape you've got available or you could use rubber bands.

Step 5 — Add Pen Holder to Rover

- Attach the Pen Holder to the front of the Rover using two black pins.

Step 6 — Test it Out!

- We used the Rover Thumbstick Remote to control our Rover when we tested out the flag. It seems to work well!

Step 7 — Take it Further

- Adding a flag to the Rover is a really simple project but it's open ended enough that you can come up with some fun new ideas for making flags and using them with the Rover.
