

TARDIS

Your own TARDIS, spinning through time and space.

Written By: Joshua

INTRODUCTION

Create your own spinning, time traveling, police box using this simple design. This project requires you to first print off and cut out our [Robot Buddies](#) body, and then put an LED on top instead of on the front. The design allows for the use of both an LED and a vibrating motor, which can both be activated via two separate pull tab switches. Two different versions of this 'skin' are available; one that you can color yourself and another which can be printed off a color printer.

TOOLS:

- [Scissors](#) (1)
- [Clear Tape](#) (1)

PARTS:

- [Origami Circuits Kit](#) (1)
- [Paper Circuits Kit](#) (1)
